

CEWELD AA NiCrO 600B

TYPE Basic flux-cored nickel base welding wire for gas shielded arc welding.

ANWENDUNGEN AA NICRO 600B is developed for welding and cladding nickel-based alloys such as alloy 600 or similar materials. This alloy can also be used for welding dissimilar nickel-based alloys to each other, to alloyed steels or to stainless steels. AA NICRO 600B can also be used on difficult to weld steels !

EIGENSCHAFTEN Latest generation basic slag quality guarantees optimum metallurgical quality and attractive welder appeal. The weld deposit meets the NiCrFe-3 requirements. Better bead aspect and shape compare to solid wires with better arc stability and improved wetting properties with less spatters. Excellent results are also achieved without protective gas.
