

CEWELD OA 58

TYPE High-alloyed fluxcored wire on a C-Cr Carbide basis for extreme wear resistant deposits on Parts

subject to strong mineral abrasion.

APPLICATIONS Rebuilding and or protecting parts that faces extreme abrasion with medium impact and wear plate

production.

PROPERTIES High wear resistance and austenitic structure deposits. The deposit gives already a very good

hardness in the first layer. A buffer layer with OA 4370 or OA MnCr is recommended in case of

sensible base material or old hardface-layers. Weldable without protective gas.

CLASSIFICATION EN ISO 14700: T Fe15

DIN 8555: MF 10-GF-60-G

SUITABLE FOR Cement industry, pumps, mixer blades, earthmoving equipment, dredging equipment and parts,

wear plates, crushing equipment, blast furnace parts etc...
