

CEWELD SPA 55

TYPE	Cored wire for the thermal spray process
APPLICATIONS	Typical applications are found in devices, which are working in an abrasive environment (e.g. industrial fans) or are used for feeding abrasive goods (e.g. rollers for conveyer belts, conveyer screw housing).
PROPERTIES	High-alloyed tubular wire for metal spray on a C-Cr carbide basis for hard and corrosion resistant deposits on parts subject to mineral abrasion. Excelent bonding strenght.
CLASSIFICATION	
SUITABLE FOR	Cement industry, shafts, pumps, mixer blades, fans, sleeves, mixers, shear blades, boiler tubes etc.
APPROVALS	
WELDING POSITIONS	
(%)	
MECHANICAL PROPERTIES	
REDRYING	Not required
GAS ACC. EN ISO 14175
