

CEWELD SPA 725

TYPE High-alloyed tubular wire based on a CCrMoNb alloy for thermal spray.

APPLICATIONS Applications that require Corrosion resistance in combination with high temperature and extreme

wear.

PROPRIÉTÉS High wear resistance with complex carbide structure. The deposit gives a extreme high hardness

and is suitable for corrosion protection, homogeneous particle distribution. The spray deposit is only

machinable by grinding with diamond tools.

CLASSIFICATION

CONVIENT POUR Cement industry, pumps, mixer blades, valves seals, bearings, magnetic sensors, dimensional

restoration.
