

CEWELD Powder 8812-Co

TYPE Agglomerated and sintered Cobalt based tungsten powder alloy

TOEPASSINGEN Ceweld SP 8812-Co is applied with the HVOF and the Plasma spray process whenever wear-resistant coatings are required, e.g. on Valves, Pumps and Turbine parts.

EIGENSCHAPPEN Ceweld SP 8812-Co is a agglomerated and sintered powder developed for thermal spraying, witch contains a uniform distribution of Tungsten Carbide and Cobalt. The particle shape is mainly spherical. The finer grades produces very tough and dense coatings which can often be used in the "as sprayed" condition without finishing.

CLASSIFICATIE EN ISO 14232-1 WC-Co 88/12

GESCHIKT VOOR Ceweld SP 8812-Co powder is usualy applied with the HVOF and the Plasma spray process whenever wear-resistant coatings are required, e.g. on Valves, Pumps and Turbine parts.
